

Project Demo Planning

Date	4 July 2026
Team ID	
Project Name	Voice Based Communication Understanding Analyzer
Maximum Marks	1 Mark

Project Demo Planning:

A structured demonstration plan helps present the **Voice-Based Concept Understanding Analyser (VBCUA)** effectively by showcasing its core functionalities, AI-based evaluation process, and overall system workflow. The demo focuses on demonstrating speech transcription, semantic analysis, audio feature extraction, intelligent scoring, waveform visualization, and PDF report generation.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, objectives, and the need for automated spoken concept evaluation.	2	Muppagowni Sai Krishna (Team Lead)
2	System Architecture & Technology Overview	Explain the project architecture, technologies used (Streamlit, Whisper, Sentence-BERT, Librosa, ReportLab), and workflow.	3	Naveen Reddy
3	Live Feature Demonstration	Demonstrate audio upload, speech-to-text conversion, semantic similarity analysis, waveform visualization, and intelligent scoring.	5	Ponnampalli Raghava
4	PDF Report Generation	Show the generated evaluation report, transcript, scores, and downloadable PDF.	2	Shaik Baharunnisa
5	Results & Performance Analysis	Explain evaluation metrics, output interpretation, and overall project performance.	2	Ibrahim Syed
6	Conclusion & Future Enhancements	Summarize project outcomes, benefits, future scope, and answer audience questions.	1	Muppagowni Sai Krishna (Team Lead)

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the motivation, objectives, and challenges addressed by VBCUA.
2	Solution Overview	Present the system architecture, technologies used, and AI workflow.

3	Live Feature Demonstration	Upload an audio file, perform speech transcription, semantic analysis, waveform generation, scoring, feedback, and PDF report download.
4	Q&A Session	Discuss the generated results, answer questions from the evaluators, and conclude with future enhancements.
