

Communication

Date	4 July 2026
Team ID	
Project Name	Voice Based Communication Understanding Analyzer
Maximum Marks	1 Mark

Communication Plan:

Effective communication was maintained throughout the development of the **Voice-Based Concept Understanding Analyser (VBCUA)** project to ensure smooth collaboration among team members and timely progress updates. Regular meetings, issue discussions, and stakeholder reviews helped track project milestones, resolve technical challenges, and ensure successful project completion.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Google Meet / WhatsApp	Team Members	Discuss daily tasks, progress, and work allocation.
2	Progress Update	Weekly	Google Meet / Microsoft Teams	Team Members, Team Lead	Review completed tasks and plan upcoming activities.
3	Issue / Bug Discussion	As Needed	WhatsApp, GitHub, VS Code	Team Members	Resolve coding issues, dependency errors, and technical problems.
4	Stakeholder Review	Bi-Weekly	Google Meet / Presentation	Team Lead, Faculty Guide / Stakeholder	Demonstrate project progress and collect feedback.
5	Final Demo Rehearsal	Once	Classroom / Google Meet	Entire Project Team	Practice the final project presentation and validate all features.
6	Documentation Review	Before Submission	Google Docs / Microsoft Word	Team Members	Review project report, diagrams, and documentation for accuracy.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Difficulty integrating OpenAI Whisper, Sentence-BERT, and Librosa libraries.	Installed required dependencies, configured FFmpeg correctly, and resolved package compatibility issues.
2	Version conflicts and runtime errors during development.	Updated Python packages, fixed dependency issues, and tested modules individually before integration.
3	Coordinating tasks among team members and tracking progress.	Conducted regular meetings, assigned responsibilities clearly, and shared progress updates through WhatsApp and GitHub.
