Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Represents entities outside the system that interact with it, such as Student, Educator, or User , who upload audio files and receive evaluation reports.
Rectangle with numbered header	Process	Represents a processing activity that transforms data, such as Speech-to-Text Conversion, Semantic Similarity Analysis, Audio Feature Extraction, Score Calculation, and PDF Report Generation.
Rectangle (solid fill, no number)	Data Store	Represents storage locations where data is saved, such as Uploaded Audio Files, Reference Concepts, Generated Transcripts, Evaluation Results, and PDF Reports.
Labeled arrow	Data Flow	Represents the movement of data between the user, processes, and data stores. Examples include Audio File, Reference Text, Transcript, Similarity Score, Audio Features, Evaluation Result, and PDF Report.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
